

# DEICHMANN

## HOW TO USE:

### 1. PRINT GAUGE

Ensure your printer is set to print at 100%. To guarantee it has printed correctly to scale, check with a ruler or measuring tape or by using a £1 coin.

### 2. PLACE CHART ON HARD FLOOR

Place the printed chart on a hard floor. This ensures that it remains flat and provides an accurate measurement.

### 3. MEASURE LENGTH ON EACH FOOT

Place heel of each foot to the line and measure the length. Ensure to measure each foot separately as feet can differ in sizes. If in between sizes, go for a bigger size.

As measuring is only a guide, it's important to check the fit of the shoes once they arrive.
